

Saving Time, Reducing Costs & Increasing Productivity

JM Wilkerson is a general contracting firm that focuses on complex projects and is knowledgeable on many different building types including multi-family, historic renovation, industrial, retail, and many others. Before using FotoIN, their manual process required the office, wasted a lot of time and money, and in the end photos were difficult to find. Now, JM Wilkerson uses FotoIN for various types of projects to fulfill photo documentation requirements.

BEFORE FOTOIN

Manual photo documentation of one floor

Every floor has 19 units that require 6 photos each to document the renovation.

- ① Digital cameras used to capture progress photos.
- ② Pen and paper used to capture information.
- ③ Cords used to transfer photos & info manually.
- ④ Photos organized by 4 digit folders & filed to server.

49 SECONDS PER PHOTO

OTHER INTERESTING FACTS:

- Photos saved from a computer to a disc or usb stick.
- Manually transferred photos to the main office.

WITH FOTOIN

Automated photo + data capture and organization

- ① Mobile software automatically syncs photos, data & reports to the company's ShareFile account.

40% TIME SAVED PER FLOOR

TOTAL HOURS SAVED PER WING **5**

\$181 SAVED PER WING

28 SECONDS PER PHOTO

"The best mobile photo documentation solution out there."

Rob McKinney,
General Manager
at JM Wilkerson

EXTRA BENEFITS

- Annotations are easily added onto any photo to eliminate the need for pen and paper.
- They use FotoIN to create specific tags that the field staff can leverage to better categorize photos.
- Field workers are able to create, sync and email PDF reports from the mobile app while on site, no need to return to the office.
- Company admin leverage the FotoIN Web Portal to easily search and filter all of their photos by project, user, date and more.
